# CV-Maker Project

## PROJECT OBJECTIVE:

This system is designed to help the job seekers to create a professional CV for them. The candidates are not required to spend more time designing and creating professional CV. They can enter their details directly into the pop-up box and their CV will be created automatically. A well-structured CV will be generated, once the user submits his/her details and user can download it in any file format, as per his/her requirement.

## EXISTING SYSTEM:

If someone wants to make his/her CV, then he/she has to look for every single detail such as formatting, alignment, designs, patterns. So, it is a very complex process and thus, the productivity of the CV also decreases. The existing system is very complex and making CV via word files and excels is a tough task. Sometimes, while making a CV, a person ends up forgetting some very crucial information while going through all these designs and formats.

## PROPOSED SYSTEM:

In the proposed system, a person has to only fill the questionnaire asked by the online platform. All the other alignments and formats of the CV are being directly taken care of by the system. Even, the final CV which came out is very professional as per the industry requirement and the candidate can download the CV as per the file format he/she requires.

## GRADING SYSTEM PHP MODULES:

### 1. ADMIN MODULE

This module is managed by the administration. Admin can authorize the teachers who are responsible for updating and inserting the marks. Admin can modify the teachers and students panel. Also, it is the admin panel which decides which action should be taken when. The teachers and the students need the authorization approved by the admin before performing any action.

### 2. TEACHERS MODULE

Teachers can log in into this panel with the credentials they will be provided by the admin. Teachers can add the names of the students and update the student's marks as per the requirement. It is the teachers who can approve the request of viewing the marks by the students. Teachers can check the student's grades and average marks as well without any prior approval from the admin.

### 3. STUDENTS MODULE

This module is designed for the students. They can view their marks exclusively as per the specific subjects they want to see. Students can request their ranks as well. The ranks can be provided either subject-specific or among the whole class or number of students appeared for that particular test. Students can log in via the credentials provided to them.

#### HARDWARE REQUIREMENT:

- Intel Core i3 (Processor).
- 12GB Ram
- 2 MB Cache Memory
- Hard disk 1T
- Genius Compatible 101 or more Key Board
- Internet connection.

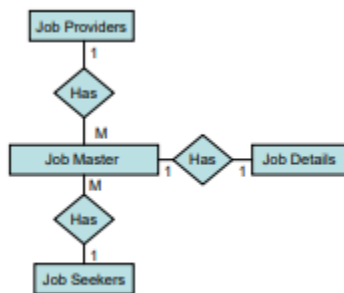

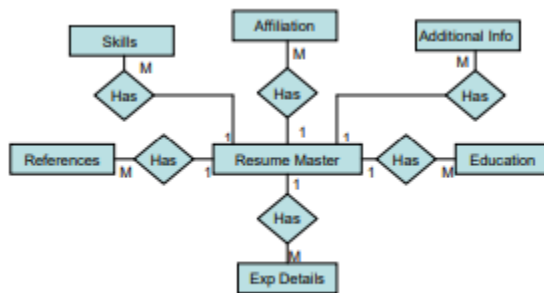

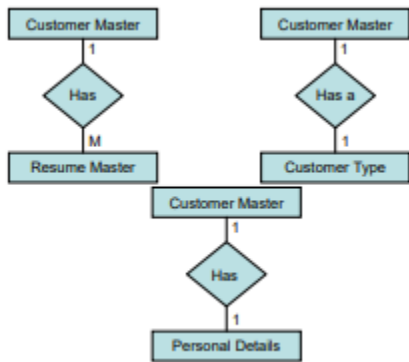

#### SOFTWARE REQUIREMENT:

- Windows
- PHP
- SQL Server 2005
- HTML/CSS

#### Personal Details:

Field Name	Data Type	Comments
User Id	Varchar(30)	Primary Key
First Name	Varchar(30)	
Last Name	Varchar(30)	
Address 1	Varchar(25)	Not Null
Address 2	Varchar(25)	
City	Varchar(50)	Not null
State	Varchar(2)	Not null
Postal code	Number(6)	Not null
Primary phone	Varchar(14)	Not null
Secondary phone	Varchar(14)	
URL	Varchar(100)	
Career level	Varchar(3)	Not null
Marital status	Char(1)	Not null
Father Name	Varchar(30)	Not null
Passport No	Varchar(10)	
Gender	Char(1)	Not null
Date of birth	Date	Not null
Active Resume Id	Number(11)	FK

**Summary**  

Senior Web Developer specializing in front end development. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including HTML5, PHP OOP, JavaScript, CSS, MySQL. Strong background in project management and customer relations.

**Skill Highlights**

- Project management
- Strong decision maker
- Complex problem solver
- Creative design
- Innovative
- Service-focused

**Experience**  

**Web Developer** - 09/2015 to 05/2019  
**Luna Web Design**, New York

- Cooperate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Develop project concepts and maintain optimal workflow.
- Work with senior developer to manage large, complex design projects for corporate clients.
- Complete detailed programming and development tasks for front end public and internal websites as well as challenging back-end server code.
- Carry out quality assurance tests to discover errors and optimize usability.

**Education**  

Bachelor of Science: **Computer Information Systems** - 2014  
**Columbia University**, NY

**Languages**  

Spanish – C2  
Chinese – A1

**Certifications**  

PHP Framework (certificate): Zend, Codeigniter, Symfony.  
Programming Languages: JavaScript, HTML5, PHP OOP, CSS, SQL, MySQL.

## Work Experience

Employer:

Job title:

City:

State:

Experience:

CONCLUSION: The online grading system is a very productive system for the teachers and the students as teachers can easily update the marks of the students and grades and percentage will come out automatically. At the same time, students can check their marks as and when required. It is a very cost-effective and time effective system.
